

Information Security

Where Security and Innovation Stands

Foreward

According to the statistics of the password management software NordPass, a person has an average of 100 sets of passwords. Whether it is a social media, a shopping platform, or even an online bank. Annoyed by forgetting passwords; we often see news that hackers have invaded personal data systems and enterprise platforms, but with the advancement of technology, is "password" really safe? In the case of no password, how to be compatible with safety, convenience and speed, let us see how FIDO can do it!

Password potential crisis

Do you also have similar experience of setting the password for each different website and systems? Some passwords must contain capitalized or non-capitalized English alphabet or even symbols and character limit. It makes your brain stuck so you always set the easiest and most convenient one to remember while worry about being stolen. Isn't it very annoying?

SDT Countermeasure

Now you only need a FIDO card which is the BobeePass of SmartDisplayer. And your brain no longer needs to be disturbed by passwords. BobeePass guarantees you quick password-free access to all your devices. Also, it makes your personal information more secured. Next, let's find out what FIDO is.

What Is FIDO?

(Fast IDentity Online) In 2012, the non-profit organization FIDO Alliance was established, a set of network identification standards were set by the alliance. It ensures the security of server and terminal device protocols during the login process. Member companies like PayPal, Google, Microsoft, Apple and other well-known technology companies have joined. And it continues to carry on following three principles:

(ease of use) 、 (privacy and security) (standardaization) °

All countries are advocating and implementing FIDO. Taiwan has no exception. At present, we have established:

- TW FIDO : TW FIDO which completed by the ministry of the Interior in September 2019 using FIDO international standards.
- F FIDO : Including the joint credit information center, financial information companies and various financial-related businesses, jointly build a digital foundation for financial FIDO.

Product Introduce

BobeePass FIDO card, protect your information security and let you log in without worries

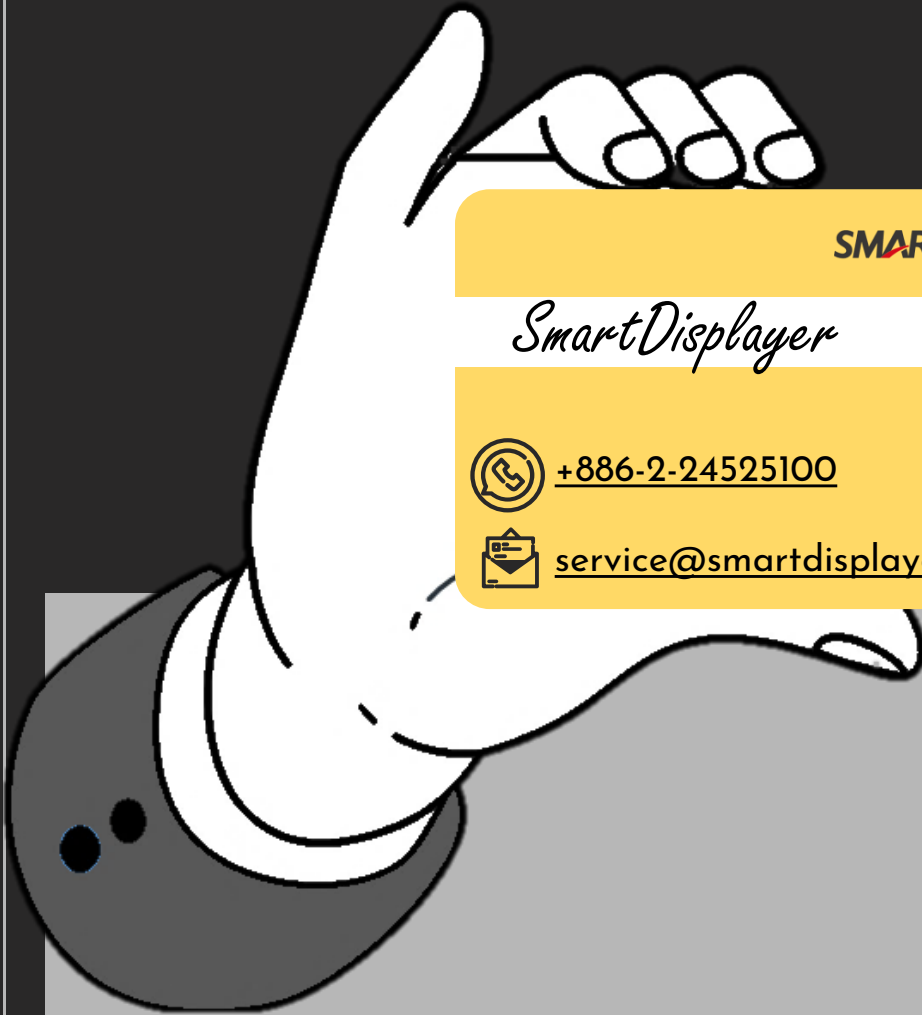

Product strength :

- FIDO Alliance Member
- FIDO2 L1 Certified
- BLE & NFC Connection
- LED indicator
- Portable credit card size
- Support FIDO2 specification

Product customization :

- Multi-Factor Authentication
- Electronic Paper Display
- Custom artwork design
- Product certificate on request : BLE/CE/FCC/NCC/KC/MIC
- Environmental friendly : ROHS/SVHC
